Education

M.Sc. in Computer Science and Engineering 2019 - 2024

Linköpings Universitet

- Teaching assistant in introductory electronics.
- Guitarist in D-Band, the official band of Datateknologsektionen.

Courses in Computer Science 2016 - 2018

Göteborgs Universitet

Courses within the areas of embedded systems, computer architecture, databases, functional-, object oriented- and parallel programming.

Technical programme 2013 - 2016

Eksjö gymnasium

Musical profile with focus on guitar. Teknikcollege scholar. Received multiple scholarships for my achievements in guitar playing and programming.

Work

Software Development Internship

Cendio Summer Internship, June - August 2021.

- Made contributions to the TigerVNC, an open source project being used within Cendio's product Thinlinc.

Software Developer

Plejd Full-time, June 2018 - September 2019.

- Took part in designing, developing and testing an embedded Linux system.
- Our team created and maintained a Linux distribution made with Buildroot running a custom microservice architecture.
- Designed software for communication with different peripherals, cloud services, service backends, manufacturing test-fixtures and third-party services.
- We focused on building a future proof, maintainable, and reliable system with great extensibility. The designed allowed us to continuously expand the system with new functionality with focus on security and customer experience.

Software Developer

Inceptive Temporary, October 2017 - March 2018.

- Developed a concept application for traffic visualisation in augmented reality. Primarily worked with data streaming and integration with ARKit.

Skills

Languages

- Swedish and English.

Programming

- Experienced with deploying and shipping software for consumer products, working in cross-functional teams using different development methodologies and testing strategies.
- Have contributed smaller patches to open source projects.
- Proficient with Python, C, C++, Swift and Java, among others. Comfortable with working in most languages and paradigms. Experience with languages such as SQL, VHDL, Assembly (AVR, MIPS, ARM), Erlang, Zig, Haskell, Rust, Javascript and Bash.
- Knowledgeable about low level programming, operating systems, concurrent programming, build systems, containers, source control management, continuous integration and deployment, debugging, development tools, data structures, algorithms...
- Happy to learn about new technologies and believes in working with the appropriate tools for the situation at hand.

Other

- Holds a class B driving license.
